

- c) An agonist anti-CD40 molecule that induces phenotypical and functional maturation of monocyte derived dendritic cells;
- d) An agonist anti-CD40 molecule that can simultaneously bind to CD40 with CD40L, as determined by their inability to inhibit CD40L binding to CD40 or their inability to inhibit binding of sCD40 to CD40L.

A 2 9. The agonist anti-CD40 molecules of any one of claims 1 to 7 which are monoclonal antibodies.

In addition, please substitute the attached drawings in compliance with 37 C.F.R. 1.84.

Respectfully Submitted,

Dated: July 15, 2002.
